OWN YOUR WEB3 DATA

ROYAL
TRADE BIZ

RoyalTradebiz mission is to ensure you have the

option of privacy in Web3 because you should

#ExpectPrivacy from the applications you use.

Web3 is about ownership that should not be limited to

holding or transferring your digital assets.

Ownership also means being able to decide what

aspects of those assets you disclose**.**

www.royaltradebiz.com

DUAL CHIAN ARCHITECTURE

RoyalTradebiz combines an EVM layer for programmability with a UTXO layer optimized for privacy. Leverage either chain model as you build dApps with auditable privacy.

By combining privacy with auditability, **RoyalTradebiz** prepares Web3 for mass adoption, empowering developers to protect users and comply with regulations.

TECHNICAL HIGHLIGHTS

ROYAL TRADE BIZ

Compatibility

A series of integral toolkits, including restful APIs, privacy SDKs, and infrastructure for EVM-compatible applications and assets

Privacy

The original UTXO-based chain with privacy-preserving features and programmability via WASM VM after our scheduled refactoring.

Efficiency

A highly-efficient, privacy-centered ZK-rollup solution optimized for private transactions, featuring EVM compatibility.
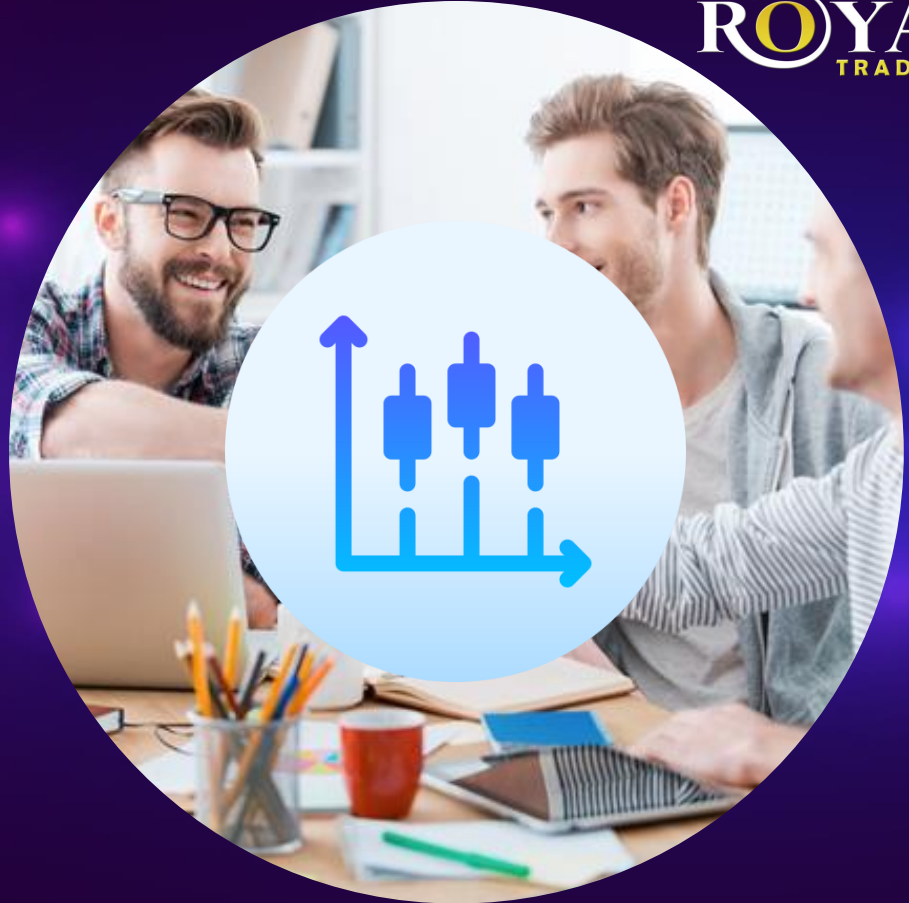

Scalability

App-chains provide Web3 games and other dApps the ability to run a dedicated side-chain on RoyalTradebiz, allowing for scalability for your growing project.
